

(continued from outside back cover)

Hydrolysis and thermolysis of urea and its decomposition byproducts biuret, cyanuric acid and melamine over anatase TiO ₂ A.M. Bernhard, D. Peitz, M. Elsener, A. Wokaun and O. Kröcher (Switzerland)	129
Utilization of e-waste as a silica source for the synthesis of the catalyst support MCM-48 and highly enhanced photocatalytic activity of supported titania nanoparticles T.-H. Liou and B.-C. Lai (Taiwan)	138
Preparation, characterization and photocatalytic activity of TiO ₂ -ZrO ₂ binary oxide nanoparticles A. Kambur, G.S. Pozan and I. Boz (Turkey)	149
Catalytic steam reforming of biomass tar over iron- or nickel-based catalyst supported on calcined scallop shell G. Guan, G. Chen, Y. Kasai, E.W.C. Lim, X. Hao, M. Kaewpanha, A. Abuliti, C. Fushimi and A. Tsutsumi (Japan, Singapore, China)	159
Pore size tuning of functionalized SBA-15 catalysts for the selective production of furfural from xylose I. Agirrezabal-Telleria, J. Requies, M.B. Güemez and P.L. Arias (Spain)	169
The effect of synergy between Cr ₂ O ₃ -CeO ₂ and USY zeolite on the catalytic performance and durability of chromium and cerium modified USY catalysts for decomposition of chlorinated volatile organic compounds Q. Huang, Z. Meng and R. Zhou (PR China)	179
Effect of a second metal (Y, K, Ca, Mn or Cu) addition on the carbon dioxide reforming of methane over nanostructured palladium catalysts C. Shi and P. Zhang (USA)	190
High selectivity in visible-light-driven partial photocatalytic oxidation of benzyl alcohol into benzaldehyde over single-crystalline rutile TiO ₂ nanorods C.-J. Li, G.-R. Xu, B. Zhang and J.R. Gong (China)	201
A parametric study of the UV-A photocatalytic oxidation of H ₂ S over TiO ₂ A. Alonso-Tellez, D. Robert, N. Keller and V. Keller (France)	209
Synergistic effects of TiO ₂ photocatalysis in combination with Fenton-like reactions on oxidation of organic compounds at circumneutral pH H.-E. Kim, J. Lee, H. Lee and C. Lee (Republic of Korea)	219
Ethanol adsorption and oxidation on bimetallic catalysts containing platinum and base metal oxide supported on MCM-41 K. Rintramee, K. Föttinger, G. Rupprechter and J. Wittayakun (Thailand, Austria)	225
Ethanol supercritical route for fabricating bimodal carbon modified mesoporous TiO ₂ with enhanced photocatalytic capability in degrading phenol Y. Zhang, P. Zhang, Y. Huo, D. Zhang, G. Li and H. Li (PR China)	236
One-pot pyridine-assisted synthesis of visible-light-driven photocatalyst Ag/Ag ₃ PO ₄ Y. Liu, L. Fang, H. Lu, Y. Li, C. Hu and H. Yu (PR China)	245
Improving the visible light photocatalytic activity of nano-sized titanium dioxide via the synergistic effects between sulfur doping and sulfation Y. Niu, M. Xing, B. Tian and J. Zhang (PR China)	253
Hypercrosslinked polystyrene sulphonic acid catalysts for the esterification of free fatty acids in biodiesel synthesis E. Andrijanto, E.A. Dawson and D.R. Brown (UK, Indonesia)	261
Enhanced oxygen reduction activity and durability of Pt catalysts supported on carbon nanofibers D. Sebastián, A.G. Ruiz, I. Suelves, R. Moliner, M.J. Lázaro, V. Baglio, A. Stassi and A.S. Aricò (Spain, Italy)	269
Photocatalytic degradation of Rhodamine 6G on mesoporous titania films: Combined effect of texture and dye aggregation forms M.N. Ghazzal, H. Kebaili, M. Joseph, D.P. Debecker, P. Eloy, J. De Coninck and E.M. Gaigneaux (Belgium)	276
Degradation intermediates and reaction pathway of pyraclostrobin with TiO ₂ photocatalysis L. Lagunas-Allué, M.-T. Martínez-Soria, J. Sanz-Asensio, A. Salvador, C. Ferronato and J.M. Chovelon (Spain, France)	285
Gold nanoparticles on titanium oxide effective for photocatalytic hydrogen formation under visible light H. Yuzawa, T. Yoshida and H. Yoshida (Japan)	294
Template-free synthesis of polymer-derived mesoporous SiOC/TiO ₂ and SiOC/N-doped TiO ₂ ceramic composites for application in the removal of organic dyes from contaminated water M. Hojamberdiev, R.M. Prasad, K. Morita, Y. Zhu, M.A. Schiavon, A. Gurlo and R. Riedel (Germany, Japan, PR China, Brazil)	303
Influence of OH-related defects on the performances of BiPO ₄ photocatalyst for the degradation of rhodamine B C. Pan, J. Xu, Y. Chen and Y. Zhu (PR China)	314
Current research on thermochemical conversion of biomass at the National Renewable Energy Laboratory R.M. Baldwin, K.A. Magrini-Bair, M.R. Nimlos, P. Pepiot, B.S. Donohoe, J.E. Hensley and S.D. Phillips (USA)	320
Band structure controls of SrTiO ₃ towards two-step overall water splitting S. Hara and H. Irie (Japan)	330
Efficiency and reactivity pattern of ceria-based noble metal and transition metal-oxide catalysts in the wet air oxidation of phenol F. Arena, C. Italiano and L. Spadaro (Italy)	336
Redox stability and electrochemical study of nickel doped chromites as anodes for H ₂ /CH ₄ -fuelled solid oxide fuel cells V.B. Vert, F.V. Melo, L. Navarrete and J.M. Serra (Spain)	346
